I'm an agentic engineer, DevSecOps specialist, Cloud Native Lead and Fujitsu Distinguished Engineer working across the Azure ecosystem. My career connects infrastructure and application engineering: cloud foundations, .NET and distributed systems, identity and security, delivery automation, AI and MCP tooling. I co-lead a technical community, mentor engineers and translate complex technical choices for both delivery teams and senior stakeholders.

CURRENT FOCUS Leading technical delivery of The Fujitsu Agentic Service Desk across AI agents, MCP, Azure and policy-driven governance.

EXPERIENCE

Cloud Native Lead
Fujitsu UK — May 2022 – Present

Lead technical delivery of The Fujitsu Agentic Service Desk, a high-priority modern workplace solution.

- **AI agents & MCP** on Azure AI Foundry — agent patterns, tool orchestration and multi-step reasoning, with hands-on reference implementations.
- **Security-first** — zero-trust, Entra ID, OAuth 2.0 / OIDC, APIM-backed JWT validation and policy-driven controls.
- **Azure at scale** — ALZ, CAF and WAF-aligned foundations; authored the ALZIF framework for modular, policy-compliant landing zones.
- **Multi-tenancy, CI/CD & governance** — architected and proved (PoC) the multi-tenant architecture, CI/CD strategy and governance.
- Co-lead of the FUSION Applications technical community (2025).

Fujitsu Distinguished Engineer
Fujitsu UK · Recognition — Mar 2024 – Present

Recognised for sustained technical excellence, innovation and influence. Set direction, mentor engineers, connect technical communities and help teams make stronger architecture and delivery decisions.

Head of Cloud Platform
Carfinance247 — Feb 2021 – May 2022

Led creation and governance of a new Azure cloud platform. Designed AKS hosting, hub-and-spoke networking, private connectivity, DNS, observability and CI/CD for migrating .NET and Node.js workloads.

Principal Engineer
Carfinance247 — May 2019 – Jan 2021

Shaped architecture, engineering standards and cloud adoption across product and platform teams; PoCs with serverless, NestJS, Dapr and KEDA; coaching and technical talks.

CORE SKILLS

Azure · AI agents · MCP · Azure AI Foundry · .NET / C# · Aspire · Terraform · Bicep · AKS / containers · DevSecOps · GitHub Actions · GitLab CI · Entra ID / OAuth · Observability

CERTIFICATIONS

- Azure AI Apps & Agents Developer Associate
- Azure Solutions Architect Expert
- DevOps Engineer Expert
- Azure Developer Associate
- Azure Security Engineer Associate
- HashiCorp Terraform Associate (004)
- Green Software
  Linux Foundation LFC131
- AWS Developer · Solutions Architect
  Earlier

EXPERIENCE, CONTINUED

Chief Technology Officer

Qualtrak Solutions Sep 2008 – Apr 2019

Led a distributed European engineering team building contact-centre quality and coaching products for 10+ years.

- Published an AWS Quick Start for Qualtrak Evaluate for Amazon Connect — the first call-centre agent-evaluation integration for Amazon Connect — built on the AWS VPC and Amazon Kinesis data-streaming Quick Starts.
- Listed the product on AWS Marketplace (AMI), integrated with AWS Marketplace Metering Service (MMS) for usage-based charging and billing.
- Introduced agile practices and CI/CD across the engineering team.

Earlier career

Consulting & development 1994 – 2008

Application and BI consulting and development roles at Crystal Decisions, Equitas, GUS, Morgan Stanley, GE Capital, AIM Technology and others.

SELECTED WORK

Azure landing-zone framework (ALZIF)

Modular, policy-compliant Azure foundations aligned to ALZ, CAF and WAF, with subscription vending and enterprise governance built in.

The Fujitsu Agentic Service Desk

Modern workplace service desk built on AI agents and MCP tooling on Azure AI Foundry with Aspire, secured through Entra ID, OAuth 2.0 / OIDC and APIM. Architected and proved the multi-tenancy model, CI/CD strategy and governance controls.

MCP Explorer X

Docker-first developer workbench for exploring MCP tools, prompts and resources, building workflows across multiple LLM providers. *Vue 3 · ASP.NET Core*

Entra Auth CLI

Cross-platform .NET global tool that simplifies Entra ID token generation across common OAuth 2.0 flows.

GitLab Summary · Cloud Share · GIF Creator

AI-assisted GitLab project, MR and pipeline-failure summaries; secure peer-to-peer sharing via temporary HTTPS endpoints; GIF production with sensitive-content redaction.

Evaluate for Amazon Connect

AWS Quick Start and AWS Marketplace listing for the first agent-evaluation integration for Amazon Connect: VPC and Kinesis data streaming, with MMS-metered billing.

PRINCIPLES

Secure by Design

Green by Design

Cloud First
